

Aida Solat

UI/UX Designer & Developer

 Istanbul, Turkey

I hope you do your best during pandemic covid-19 and be safe and happy!

For more than five years, I've been working in the field of different computer systems, including networks, software, hardware, that can have each one a big cloud that provides information and questions in my brain :)

I remember my first work at the Crown corporation for the IT management building. It was a delightful time for me. I thought it was 2011. It was the first time I assembled Crosswire networking! I can't forget and define my feelings. Thank God I am happy and working on UI/UX Designs and Front End Development around mobile applications and web applications using HTML/CSS/javascript/react and other tools and repositories that you can see in my resume.

And my last note:

No one can be as same as yourself. Be the best one.
